PROJECTS

Just Say

Just Say is a voice to text app, that provides continuous speech recognition that helps you create long notes, dictations, essays, posts, reports. You can also share your notes using your favorite app (Gmail, twitter, SMS, Viber, Skype, etc). And also can translate them into other Languages

Child Adoption Portal (Academic)

A system created with PHP, MySQL, HTML, and CSS to find orphan children and adoption centers nearby and make the adoption process easier.

Room automation (Academic)

A complete room automation system created using Arduino UNO, DHT11, Flame Sensor, LDR, and other various components.

Other Contributions

Worked with some APIs and updated some features in VICEROY restaurant Management Android application. Have some contribution in an Android App called Daily Islam, Fitness Workout and many more.
